ZONE 1: The Splash Zone
Parts of Zone 1 may only be submerged for a few hours on a few days each month.

ZONE 2: The High Tide Zone
The high tide always reaches high enough to cover Zone 2, if only for a short period each day.

ZONE 3: The Mid Tide Zone
These tidepools are less exposed than those in Zone 2, and a thick growth of algae provides a damp, cool cover for more animals.

ZONE 4: The Low Tide Zone
Tidepools in Zone 4 are only revealed for a few hours on a few days of each month.

The Sub-Tidal Zone
Always submerged in 50-56°F water.

Fitzgerald Marine Reserve Map of Tide Zones

The Sub-Tidal Lagoon
Always submerged in 50-56°F water.
